

Murtaza Rafi

Fullstack Developer | Software Engineer

Stockholm · 0737398366 · murtaza_bayat@hotmail.com · <https://www.linkedin.com/in/murtazarafi>

PROFILE

Analytical fullstack developer with 3 years of experience building business-critical application. Built a modern web application while working with the full development lyfe cycle in C#, .NET Core, MySQL and Azure, with modern frontend in TypeScript and Vue.js. Delivered excellently in different Agile/Scrum teams both as a developer and Incident Manager and Support Engineer at Vattenfall. With a Master's in Engineering Mechanics from KTH, I'm now actively expanding into Python and AI/ML. Good references upon request.

IT COMPETENCES

Backend: C# · Python · Matlab · .NET Core · REST APIs

Frontend: TypeScript · JavaScript · Vue.js · React

Cloud & DevOps: Azure · CI/CD · Git · DevOps

Databases: MySQL · SQL · PostgreSQL

AI: AI-assisted development tools · prompt-driven coding · Basics of AI/ML

Testing: Unit Testing · Selenium · Cypress

Ways of working: Agile · Scrum

WORK EXPERIENCE

Career Break · *Studying on my own + experimenting with my own projects*

FEBRUARY 2026 – AUGUST 2026

I have had a career break February to August and have been studying and deepening my knowledge within Python and AI/ML. I have also summarized my knowledge and different experiences.

- How to write clean and professional code in general and in .NET/C#.
- How to write clean code in TypeScript.
- Expanded my general and basic knowledge of Python and AI/ML.
- Got familiar with different machine learning methods and how they work.
- Experimented and built projects using AI tools fast and efficiently for translating excel to fitting graphs.
- Learned about LLMs and how to integrate them for example as a chatbot to web application.

Teck skills: PostgreSQL, React, TypeScript, Python, AI and ML fundamentals, Python, AI/ML fundamentals

Fullstack Developer · *Auticon (fd. Unicus), Stockholm*

OCTOBER 2023 – JANUARY 2026

Back with the internal assignment at Unicus. Worked with a more advanced and developed version of their web application - among other things to expand the application between different countries at Auticon.

- Came up with the design of different views and pages both independently and in our team.
- Built APIs end to end using C#/.NET Core, Vue with TypeScript and MySQL.
- Improved Gant-graphs, tables and graphs design for improved user readability and work.
- Developed algorithms for sorting and filtering dropdown menus with complex structures and database table connections.
- Solved complex production issues both independently and collaboratively.
- Worked with cloud-based Azure environments and contributed to CI/CD and release processes.
- Participated throughout the full software development lifecycle including planning, development, testing, deployment, and maintenance.
- Collaborated closely with developers, testers, and the managers in Agile/Scrum teams.
- Used AI tools to develop faster and more efficiently.
- Improved our way of working by coming up with ideas on efficiency.

Teck skills: C#, ASP.NET Web API, MySQL, Vue.js, TypeScript, Azure, Devops, CI/CD, Agile/Scrum Environment, Python, Testing

IT Consultant · *Auticon (fd. Unicus), Stockholm*

MAY 2022 – SEPTEMBER 2023

Assignment as Incident Manager and Support Engineer at Vattenfall

- Acted as Incident Manager and Support Engineer in enterprise production environments.
- Ensured reliable operations and SLA compliance for internal IT support systems
- Maintained, modified and added servers in critical and large systems

Key skills: Incident Management, Communication, Technical Support, Powershell, Terminal, Active Directory

Fullstack Developer · Auticon (*fd. Unicus*), Stockholm

NOVEMBER 2021 – APRIL 2022

I worked as a Full-stack Developer on Unicus internally used web application. Started with a team of 6-7 people to build their application almost from scratch.

- Came up with many ideas on how we could improve the web application like having modals instead of several tables
- Came up with the design of different views and pages both independently and in our team
- Built APIs end to end using C#/.NET Core
- Built different validations for dates and other data types and fields
- Improved Gant-graphs color coding to improve information readability
- Worked with cloud-based Azure environments and contributed to CI/CD and release processes.
- Solved complex production issues both independently and collaboratively.
- Participated throughout the full software development lifecycle including planning, development, testing, deployment, and maintenance.
- Collaborated closely with developers, testers, and the managers in Agile/Scrum teams.

Teck skills: C#, ASP.NET Web API, MySQL, Vue.js, TypeScript, Azure, Devops, CI/CD, Agile/Scrum Environment

BACKEND DEVELOPER INTERNSHIP · Bluewatt, Stockholm

JUNE 2021 – SEPTEMBER 2021

- Developed backend functionality and integrations using .NET Core.
- Integrated external APIs into production systems, including Tesla-related APIs.
- Wrote unit tests and supported debugging and application stability improvements.
- Worked in a fast-paced startup environment with collaborative development workflows.

Key skills: C#, .NET, ASP.NET Core, Web API, Unit Testing, API integration, Startup Environment

Substitute Teacher Bemannia, Stockholm

FEBRUARY 2020 – JUNE 2020

Taught natural science subjects and mathematics to both upper elementary and high school classes.

Key skills: Pedagogical skills, natural science subjects

EDUCATION

Software Development - Python and AI · Lexicon IT-Proffs, Stockholm

SEPTEMBER 2026 – MARCH 2027 (ongoing)

Six-month intensive program

- Python programming — Python fullstack, object-oriented programming, data processing
- Databases — relational databases and SQL
- Deployment — Docker, cloud, CI/CD
- Development environment and tools — Git/GitHub, project management tools, API and system integration, Linux, data analysis and visualisation
- Artificial Intelligence and Machine Learning — foundations of AI, machine learning, deep learning
- LLM basics — prompt engineering, RAG (Retrieval Augmented Generation)
- AI in practice — automation, agents, cloud-based data analysis, AI security (GDPR and the EU AI Act)

.NET Software Development · Lexicon IT-Proffs, Stockholm

AUGUST 2020 – SEPTEMBER 2021

C#, Object-Oriented Programming, Database (Entity Framework, Linq, SQL), Front-End (HTML, CSS, JavaScript, jQuery, Bootstrap), MVC, API, Testing, Azure, Git, Scrum

Master in Engineering Mechanics · *KTH Royal Institute of Technology, Stockholm*

SEPTEMBER 2017 – NOVEMBER 2019

Bachelor in Vehicle Engineering · *KTH Royal Institute of Technology, Stockholm*

SEPTEMBER 2013 – JUNE 2017

Mathematics I · *Stockholm University, Stockholm*

SEPTEMBER 2012 – JANUARY 2013

CERTIFICATES

AZ-900: Microsoft Azure Fundamentals · ISTQB CTFL

LANGUAGES

Swedish (Fluent) · English (Professional) · Dari (Native) · Arabic (Basic) · Urdu (Basic)
